EDUCATION

African University of Central Africa(AUCA)

B.A. in software Engineering(information tech

Kigali city, Gishushu

June 2024– Present

RELEVANT COURSEWORK

Software Development | Web Applications | Networking | Cybersecurity | Problem Solving | Big Data | Data Structure

PROFESSIONAL EXPERIENCE

Upskills Program

May 2024 – August 2024

- Built strong foundations in coding, debugging, and applying software engineering principles to real-world problems

The Gym Program(IT training)

June 2025 – October 2025

- Strengthened system knowledge and technical discipline through hands-on IT training and practical problem-solving

Africa To Silicon Valley (A2SV)

December 2025 - Present

- Advancing skills in data structures, algorithms, and competitive problem solving to meet industry-level standards

Strong understanding of data structures, algorithms, and efficient problem-solving techniques

Innovation Center - AUCA

January 2026 – Present

- Collaborating on innovative and scalable technology solutions in a team-based development environment

PROJECTS

Emergency Severity Prediction System

December 2025 – January 2026

- Developed a system to analyze emergency-related data and estimate severity levels using structured data analysis techniques
- Prepared, cleaned, and organized datasets for machine learning model training to improve prediction accuracy
- Supported data-driven decision making by transforming raw data into meaningful and actionable insights

Job Application Management System

May 2025 – June 2025

- Built a full-stack web application using PHP and MySQL to manage and track job applications efficiently
- Implemented features for storing, retrieving, and updating application data with a focus on usability and system functionality

EduSta Big Data Projection

September 2025 – November 2025

- Contributed to analyzing large-scale educational datasets, performing data cleaning and preprocessing for accurate analysis
- Applied big data concepts and techniques to extract meaningful insights and support data-driven conclusions

E-commerce Product Page — HTML, CSS, JavaScript

June 2024 – August 2024

- Developed a responsive and interactive product page with a focus on user experience and modern UI design
- Implemented dynamic user interface features such as product selection, interaction handling, and basic cart functionality

TECHNICAL SKILLS

Programming Language: Python, Java, PHP, JavaScript, SQL

Web-Development: HTML, CSS, PHP, MySQL

Networking & System: LSM, DHCP, RIPv2, SSH, Cisco Packet Tracer

Cybersecurity: Vulnerability Assessment, Penetration Testing Practice

Problem Solving: Algorithmic coding practice on LeetCode, hackerrank, codewars, codeforces.

Tools: IntelliJ, VSCord, PyCham, GitHub, NetBeans, Linux

MEMBERSHIPS AND INTERESTS

Language: Fluent in Kinyarwanda, Kirundi, and English, French Student

Certifications: Cisco Networking Academy, Networking Basics & Net0ps, Upskills Program , The Gym Program — IT Skills Training Certificate

Additional Memberships: A2SV, The Gym(Rwanda), AUCA(Rwanda)

Interests: Coding, solving technical problems consulting, singing, listening to music, dancing, documentaries, NBA (Lakers), reading books like Rich Dad, Poor Dad, Things Fall Apart, Think Big, Gifted Hands, netball, conversations.
